PLENTY MOISTURE FIRST OF WEEK

MANY FARMERS HAVE THEIR SPRING SEEDING COMPLETED

Most of the farmers in the Carbon district have taken advantage of the fine weather the past couple of weeks and have their wheat acreage all seeded. It is estimated that 70 per cent of the seeding has been completed in this district. The farmers to the north were a little later in getting on the land and as a consequence they have been unfortunate so far as being able to get on the land for a few days at least.

On Monday the weather turned to the April showers and later the rain turned to snow. This has kept up continuously for the past couple of days and a great deal of moisture has fallen. Up to the present rain there was little more than enough moisture in the ground to germinate the seed. Now however, it is estimated that this last rainfall will carry the crops on till about the middle of June. Those who have not commenced seeding on account of the dryness of the season, will have no excuse now and will be on the land as soon as it is dry enough to work.

"PLUNGING HOOF" A SUPERB PICTURE

The combination of beautiful locale well knit plot and superb acting on the part of all members of the cast, human and animal, is outstanding in "Plunging Hoofs," the Universal picture which is to show at the Carbon Theatre on Friday and Saturday of this week.

Rex, King of Wild Horses, who plays the starring role, is without a doubt the most amazing horse on the screen. He is a real wild horse and was roped out of a wild herd.

"Plunging Hoofs" is the romance of a dance hall girl and a parson. They meet while freeing Rex from a trap

CANADA POINTS AN OBJECT LESSON AND EXAMPLE TO ALL WHO HAVE THE INTEREST OF THE DOMINION AT HEART.

set for him. The proprietor of the dance hall wants to marry the girl himself. Through the efforts of Rex, the proprietor is beaten in a fight and the parson and the girl are free to get married.

Jack Perrin, the hero of other Rex pictures, plays the parson. Barbara Worth is the dance hall girl.

A girl named plain Mary at her birth dropped the "r" when she grew up and became Miss May. As she began to shine in a social way, she changed the "y" to "e" and signed her letters Mae. About a year ago she was married and now she has dropped the "e" and it is plain "ma." That's evolution.—Exchange.

REGULAR MEETING OF CARBON M.D.

A regular meeting of the Council of the Municipal District of Carbon, No. 278, was held in the Municipal office, Carbon, on Tuesday, April 8th. There were a number of visitors at the meeting representing road machinery companies and representatives of chemicals to destroy noxious weeds.

The Council decided to pass a By-Law contributing a grant of \$100 to the Salvation Army and \$25 to the Canadian Red Cross Society.

A number of residents from Rose-dale were present. They have in view the matter of incorporating their Hamlet as a Village.

Representatives of the Drumheller Stampede Association interviewed the Council with a view of obtaining assistance in the construction of a race track.

Messrs. McCannel Bros. and Company were appointed Auditors for the year.

A number of matters regarding relief and hospital accounts of indigents were discussed.

It was decided at this meeting that the Income Grant this year would be expended in Division No. 1, North of Carbon and the Capital Grant would be expended in Division No. 5.

A number of accounts were passed for payment and Mr. R. S. Near, Delegate to the Hall Insurance Board Convention, addressed the Council and his report was accepted.

EASTER THOUGHTS

No happier miracle was even invented by Nature than that which is worked with overwhelming success every Easter, when even the Methuselahs of the human race feel young and eager again, although their old bones may not allow them to be exactly frisky. But the miracle does not finish with that; for at the heart of this April festival of new buds, new lambs, and new lovers, there is a queer, paradoxical air of oldness, a sense of eternity's great age merely beginning once again, and that for the hundred thousandth time instead of for the ecstatic first time, as it seems at the moment, the woods and gardens are "wearing white for Easter-tide."

In a word, the first popular holiday of the year comes to us with traditions no less than does the autumn, that looks far more venerable against her background of fruit and sheaves, or winter, hoary amid her snows and holly. As a matter of logic, Easter's traditions must be the most ancient of all, and a spring day would have the thickest encrustment of them did it not bear them as lightly as it wears

LITTLE ITEMS OF LOCAL INTEREST

Rev. Wm. McNichol is expected to arrive home this week from Toronto, and will conduct his services as usual on Sunday in the United Church.

A tea, sale of work and home cooking, will be held by the Carbon W.A. in the Farmers Exchange Hall on Saturday afternoon, April 19th.

Tomorrow is Good Friday and a Dominion holiday. All places of business will be closed. Monday is a bank holiday only.

A number of the local people motored to Drumheller last Friday night to take in the "talkies" at the Napier Theatre.

W. Reid, Jasper Rochester and Edgar Anderson were visitors to Calgary last week.

J. A. MacDonald motored to Three Hills last Saturday.

This rain is just what the country needed. It is welcomed in all quarters and was general throughout Saskatchewan and Alberta.

Miss Millicent James motored from Edmonton last Saturday with friends. They returned to that city Sunday evening.

Hugh MacDonald arrived home on Friday last from Calgary, where he is attending Normal school. Hugh is at Swallow this week taking charge of the school there in order to get in his necessary four days teaching practise.

Mrs. Ross Thorburn was called to Calgary last Sunday owing to the sudden change to her husband's condition in the hospital.

Mr. and Mrs. S. F. Torrance were Calgary visitors last Friday.

The Bus did not run a couple of days this week on account of the bad roads caused by the recent rain.

Have you reserved your seat for the play "Safety First?"

Miss Ethel Pimm came out from Calgary on Sunday and is visiting in Carbon with her sister.

S. F. Torrance is having a new telephone directory issued and it will be ready for distribution next week.

WEEKLY HEALTH BULLETIN Issued by Red Cross Society

YOUNG AND NINETY

We know a young lady of ninety-three who is living a wonderful life although sadly crippled by a broken hip, this bright spirit has never allowed herself to become aged. Her secret is worth passing along. She never burned the candle at both ends—she never ate ill balanced meals—nor food that was obviously unsuitable for aging arteries—nor in too large quantities. She always slept well in a fresh aired room. She always kept her mind at ease, refusing to worry over trifles that age the mind.

She always smiled; she enjoyed a hearty laugh. Her happy cheerful disposition was indeed a benediction to all with whom she came in contact. Last and best of all, she lived unselfishly and gave some of her substance to others in misfortune. She was often heard to say that one of her happiest interests in life was being a member of the Red Cross Society. She herself could not be active in the sort of work that the Society was doing, but by doing the little she was able, financially, she realized that joy of service to others, and gained in happiness and contentment thereby.

The blossom; how could there be an autumnal season at all if it were not preceded by spring and Easter?

MEETING TO DECIDE IF TENNIS COURTS BE MOVED

A joint meeting of the Village Council, members of the Carbon Tennis Club and members of the Carbon baseball Club, was held in Alex Reid's office on Monday night for the purpose of discussing the possible moving of the Carbon Tennis courts from the center of the park to the side, in order to provide space for baseball and soft ball. After considerable discussion we understand that it was agreed upon to measure the grounds and if there is sufficient room for two tennis courts in the trees and two near the gate, that members of all organizations would turn out and help move the tennis courts and put them in shape. We understand there is room.

'SAFETY FIRST' TO PLAY APRIL 30

The evening of Wednesday, April 30th has been set as the time for the play "Safety First," which is being presented in the Elks hall by the local "community Players." This play is a three-act farce-comedy and should take well with the audience.

The following is a synopsis of the play, which will have to be seen to be appreciated:

ACT I.—Jack's ill suburban home. A misplaced husband. "He kissed me good-bye at eighteen minutes after seven last night and I haven't laid eyes on him since." The Irish maid is in full sympathy but she imagines a crime has been committed. Elmer, the college boy, drops in. And the terrible Turk drops out. "Sure the boss has eloped with a Turkey!" Jack and Jerry come home after a horrible night. Explanations. "We joined the Shriners, I'm the Exalted Imported Woggle and Jack is the Bazooki!" A detective on the trail. Warrants for John Doe, Richard Roe and Mary Moe. A bright idea. "We're on our way to Florida!" Jack's wife decides to go with him!

ACT II.—A month later. Jack and Jerry reported drowned at sea. The Terrible Turk looking for Zuleika. The return of the prodigals. Ghosts. Some tall explanations are in order. "I never was drowned in all my life, was I, Jerry?" "We were lashed to a mast and we floated and floated and floated!" A couple of heroes. The Terrible Turk hunting for Jack and Jerry. "A Turk never injures an insane man." Jack feigns insanity. Mary Ann spills the beans and Mrs. Bridger gets excited. "We are leaving this roof forever!" The end of a perfect day.

ACT III.—Mrs. Bridger's garden. Elmer and Zuleika start on their honeymoon. Mabel forgives Jack, but her mother does not. They decide to elope. Jerry's scheme works. The two McNutt's. "Me middle name is George Washington and I cannot tell a lie." The detective falls in the well. "It's his ghost!" Jack and Jerry preparing for the elopement. Mary Ann appears at the top of the ladder. A slight mistake. "It's a burglar, mum, I've got him!" The terrible Turk finds his Zuleika. Happiness at last.

Following the play will be a big dance in the hall, to which no extra admission charge will be made.

Secure your reserved seats from the Drug Store at an early date.

One Sunday morning a minister and two lovely choir girls were gazing at the beauties of the river after church. A disciple of Walton, thinking they were fishing, walked over to see what luck they were having.

"Any bites?" she inquired.

"Sir," answered the indignant minister, "I fish for men only."

"Well, you're certainly using the right kind of bait," retorted the fisherman.

Rastus was proudly sporting a new shirt when a friend asked: "How many yards does it take for a shirt like that?" Rastus replied: "I got two shirts like this out of one yard last night."

The Problem Of Unemployment

The nations of the world, and more especially those of the white race, and of these those most highly industrialized, are confronted with a common problem which is becoming increasingly acute, namely, unemployment, resulting from a lack of gainful employment for hundreds of thousands of people, able, willing and competent to work, but who are unable to secure it.

The present situation is a paradox. No less competent an authority than the United States President's Committee on Recent Economic Changes reaches the conclusion that the rise in unemployment in recent years is not so much the result of recession in industry, closed factories and general depression,—usually advanced as causes of unemployment,—as it is the direct outcome of prosperity itself.

In other words, the intensified activity which has characterized progress in the past decade has likewise intensified, and in a sense created anew, one fundamental economic problem—the problem of unemployment.

The problem of unemployment has been recognized since the war as a serious one in Great Britain, and greater publicity has been given the British situation than in other countries, largely because of the fact that in Britain, with its schemes of unemployment insurance, facilities existed for obtaining a more accurate accounting of the actual number out of work. It is now becoming more generally known that the percentage of unemployed to population is almost as high in many other countries, and higher in some. And the number of the enforced idle is increasing, until it is now estimated that 20,000,000 or more throughout the world are unemployed. The situation in Canada is decidedly better than it is in the United States, Great Britain, Germany, Italy, and most other countries. Even so, unemployment is a subject of growing concern in this Dominion to all Governments, municipalities, labor organizations and business interests in general.

Of course, in a young and developing country like Canada, and particularly in view of its long winter months which necessarily slow up many of our major activities, there always has been and, in all probability, always will be seasonal unemployment. That is unavoidable, and those engaged in occupations which must slow up, or be temporarily suspended in the winter, must, like the farmer, earn a sufficient amount in the months of activity to carry him through the slack period.

But why, following one of the most active years in the industrial history of Canada, with building construction records greater than ever before known, with development works of all kinds in progress, unemployment practically unknown, business maintained at a high peak, which was the situation during the first three-quarters of 1929, should the unemployed problem be more acute than ever in the late fall and winter months? The answer cannot be found in any one thing, but is made up of many factors.

Let us consider Western Canada alone. In 1928, with a record crop volume of low grade, this country had to import over 50,000 harvesters, thus providing temporary employment which benefitted the whole country. In 1929 it was not necessary to import any harvest help, partly because of a 50% reduction in grain yield owing to drought conditions, but also largely because combined reaper-thresher machines, coupled with the use of motor trucks on a large scale, eliminated the work hitherto performed by manpower.

Decreased volume of production resulted in a heavy falling off of railway freight movement, and consequent large decrease in railway employment, which was accentuated by the general tie-up in the wheat markets. All down the line business was affected adversely, and unemployment grew.

Again, take railways. Every year witnesses increased traction power of locomotives. In the United States the tractive power of locomotives per railway employee increased 11 per cent. in the seven years between 1913 and 1920, but 35 per cent. in the two years between 1925 and 1927. Here in Canada, the C.P.R. and C.N.R. are introducing huge locomotives of great power undreamed of ten years ago. Enormous tonnage is now hauled in a single train which not many years ago would have called for the operation of two or three trains. Thus the number of train crews is lessened.

Cheap electric energy distributed all over the country, with a multitude of new machines of all kinds, electrically operated, is replacing hundreds and thousands of small industries where much work was done by hand.

But, it will be said, great industries have been built up as a result of new inventions which now employ hundreds of thousands, as, for example, the automobile industry, radio, aviation. True, but each replaces something else. Consider the automobile, and its companion the truck. It has replaced the manufacture of carriages, buggies, farm and other wagons. The making of harness is fast disappearing. The village blacksmith is almost extinct. On the one hand the automobile industry provides increased freight traffic for the railways; on the other hand it takes both freight and passenger traffic away from them.

One motor truck does the work of several horse drawn wagons; one combine replaces two binders, a threshing outfit, and a score or more stockers, teamsters, and other helpers. A motor driven power shovel or ditch digger supersedes a small army of laborers. The radio has silenced many a piano and phonograph. The moving picture has closed up the theatre with its travelling shows in all but the largest cities, and now the "talkies" with their elaborate musical presentations are finishing the work, as well as throwing thousands of men and women engaged in theatre and moving pictures out of work. Each picture is its own orchestra.

Mass production aided by wonderful new machinery turns out products of all kinds in ever increasing volume, employing one man where formerly a score found work. That one man receives greatly increased wages and enjoys a higher standard of living, but his high wages are but a mere fraction of the cost of production with cheap power, machinery, and mass production the main factors of cost. So while he and others prosper, and many people enjoy things formerly denied to them because of their cost, the unfortunates displaced in this onward march of progress are unemployed and in distress.

With no work to be found for which by previous training and experience they are best fitted, they find all other avenues closed to them because the same process is at work everywhere.

What is the solution? No man yet knows. It will be found, because it must be. The continuance of civilization depends upon it. In a word, as one writer puts it, something of the same kind of engineering efficiency which has brought about these displacements of man-power will have to be applied to the problem of finding openings for competent men where they are needed.

An old temple bell has been restored to Japan by a Swiss museum as a token of loyalty to the League.

Invention For Blind

Standard Typewriter Keyboard Can Be Converted Into Braille System

John Lemp, Tavistock druggist, has completed an invention whereby the keyboard on any standard make of typewriter may be converted into a Braille system keyboard for blind persons, who may wish to take up stenography.

The invention consists of a set of brass caps, embossed with Braille letters and figures instantly detachable.

Mr. Lemp, who has a blind daughter, has offered the invention free to institutions for the blind.

A SPRING TONIC AN AID TO HEALTH

You Can Lay the Foundation Of Good Health Now By Building Up Your Blood and Strengthening Your Nerves Through the Use Of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the Springtime, like most of the customs of our grandparents, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in rugged health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic of the blood and nerves at this time will do much for such people, by putting color in the cheeks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine, there is no safer or better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening tired nerves and run-down organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Mrs. L. Hupman, Summerville Centre, N.S., writes:—"Dr. Williams' Pink Pills have been of the greatest benefit to me. A few years ago I was in a badly run down condition. I became so weak and nervous that I could scarcely go about, and doing my housework left me completely used up. Everything seemed to worry me, and I was in a very discouraged condition when I began taking Dr. Williams' Pink Pills. I soon found the pills helping me, and continuing their use I fully regained my health. Since then I always take a few boxes in the Spring to build me up for the hot weather, and always I find the best results. I therefore cheerfully recommend these pills as the best of health builders."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Use Good Seed

In the opinion of a successful farmer and grain exhibitor, registered seed or seed closely traceable to registered is preferable because it produces uniformity in ripening, in appearance and in the shape of kernels. Impure or mixed seed is sure to produce a sample with different types and lacking in uniformity.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and sciatic pains, treating sore throats and chests, coughs, burns, scalds, cuts, bruises and sprains.

Largest Deposit Of Diatomite

The largest deposit of diatomite in the Dominion at present known is in the vicinity of Quesnel in central British Columbia, where material of pure grade occurs in beds forty feet thick that extend over a huge area.

No one need endure the agony of corns with Holloway's Corn Remover at hand to remove them.

Ruins of an old Roman wharf, where no doubt the emperors' pleasure galleys were once moored, have been found at Lake Nemi.

W. N. U. 1833

New Line To Bay Shortens Route

Sturgis Cut-Off Will Be Ready For Operation Early In May C.N.R. States

Construction work on the Sturgis-Hudson Bay Junction branch line of the Canadian National Railways will be finished about May 18, and the line will be turned over to the operating department on that date. An announcement to this effect was made recently by A. E. Warren, western vice-president of the company.

A very considerable saving in time and distance between southern Saskatchewan and the Hudson Bay Railway will result with the completion of this line and the opening of it for regular freight and passenger service. Between Regina, Moose Jaw and other southern points in Saskatchewan there will be a lessening of 94.6 miles over the existing route from those centers to The Pas. Intermediate points such as Melville and Yorkton will also be brought considerably nearer to The Pas and the Hudson Bay Railway.

Until the Sturgis-Hudson Bay Junction line goes into operation the route from Regina to Hudson Bay Junction is via Swan River, a distance of 429.6 miles. The distance by way of the new route which lies through Melville, Yorkton, and Canora will be 335 miles.

Passenger and freight train services are now under consideration by the departments concerned but it is not expected that an announcement on train service will be made for a few weeks.

The Sturgis-Hudson Bay Junction line was one of those included in the three-year branch line programme which was passed by parliament in 1927. Although it is practically the last item on that programme to be completed, the date upon which it is to be turned over for operation is more than six months ahead of that set by the bill. This adds to the enviable record of the engineering forces of the Western Region of the Canadian National Railways in completing all its construction work months ahead of the limit set by parliament. The laying of steel to Churchill and the completion of the Flin Flon and Sheridan Railways and the Aberdeen-Melfort branch line are other examples.

Combines In Western Canada

The successful introduction of the combine into Western Canada by the Dominion Experimental Station at Swift Current, Saskatchewan, in 1922 has aided materially in establishing this system of harvesting in the Prairie Provinces. Since its introduction in 1922, the use of the combine has spread till in 1928 over 3,650 combines were sold in Western Canada.

Don't dose a Child's Cold

CONTINUAL dosing upsets children's delicate stomachs. Vicks is applied externally and therefore cannot disturb the digestion. It acts in two ways:

(1) The body heat releases the ingredients in the form of vapors which are inhaled.

(2) At the same time Vicks "draws out" the soreness like a poultice.

acts 2 ways at once

New "Ice" Discovered

New Liquid Yet Unnamed, Boils At 18 Degrees Below Zero

Discovery of a new refrigerant which, it is held, will bring about a vast improvement in living conditions, has just been announced by the division of industrial and engineering chemistry of the American Chemical Society.

The refrigerant, as yet unnamed, is a compound of carbon, chlorine and fluorine and is technically known as fluoro-chloro-methane. It is a clear white liquid, boiling at 18 degrees below zero Fahrenheit. Commercial production, the announcement said, will probably not be practicable for at least two years.

Saskatchewan Coal

Saskatchewan's coal production in 1929 was more than 100,000 tons higher than in 1928, and created a record for the province. Total production was 568,759 tons as compared with 464,428 tons in 1928.

EDOUARD J. ROULEAU,
Editor and Publisher

THE SPRING OF THE YEAR

Seeding and planting is the order
of the day. Every farmer who may be
truly called a farmer is busily em-
ployed in putting in his crops or has
just finished. The croaker or paper
farmer is sitting about on store boxes
at the village store deploring the state
of the weather: "too wet to plow or
plant anything," while last week it
was too dry. The weather is never
just right for these fellows. They, like
Wilkins Micawber, are waiting for
something to turn up. Instead of go-
ing out to turn up something. The
prudent farmer is at home, wet or dry,
when it rains, doing odd jobs that he
need not do when he ought to be in
the field. Apportion your time, you
need all of it; have a system in per-
forming your work; work in season
and plant in season, so when harvest
comes the fruits of your labor will be
fully realized. Stop your croaking
about the worthlessness of the coun-
try. If the country don't suit you,
pack up your traps and go. Nobody
compelled you to come here and no-
body will stop you from going, pro-
viding always, you can escape the
sheriff.

THE HAWKER AND PEDDLER

With the recent decision to inau-
gurate a business tax in Hanna, citi-
zens will have all the more reason to
show loyalty toward the business man
in their midst; the man who contri-
butes directly and indirectly, day in
and day out, to the growth and pros-
perity of our "home town."

The hawker and peddler who exhi-
bits his wares from door to door may
tempt the thoughtless householder,
but the man and woman who realizes
that no town would be worth living
in if it were not for progressive busi-
ness men, will give these birds of pas-
sage little encouragement.

"Be loyal to your own community,"
is a slogan of which every citizen
should take heed.

The hawker and peddler has receiv-

ed encouragement at the hands of the
Alberta government, but the citizen
who is loyal to his own town and
community will discourage the door-
to-door peddler of pants, printing and
prunes.—The Hanna Herald.

HE IS RISEN

When centuries ago, this gladso-
cry rang out from the faithful watch-
ers by the tomb of the Man of Galilee,
there was given to the world one of
its most precious gifts—a certain
hope of life beyond the grave. It is
true that down through the ages
theories have been propounded, and
arguments have waxed hot, as to just
what this after life would be, and
while no satisfactory solution has ever
been given, nor we opine ever will be,
the fact remains that because of the
resurrection, we of this present age
have an anchor of hope that otherwise
could not have been ours.

It matters not whether we are ad-
herents of any of the many dogmas
and creeds of the present day, or whe-
ther we subscribe to none, those three
magic words, uttered almost two
thousand years ago, have a deep sig-
nificance in the lives of all of us.

Picture, if you can, the hopelessness
of a world without hope—the desola-
tion of our lives, if, in triumphing
over the grave, the Master had not
also given to us hope of a similar
triumph.

Easter commemorates not only the
world's greatest tragedy, it dates also
the birth of the world's greatest hope,
the putting into operation the world's
greatest balance wheel. With this an-
chor of faith removed, civilization
would totter, and if existence con-
tinued it would be of the lowest and
most benighted kind.

Alberta led the western provinces
in the number of successful farm
placements made in 1929 by the
Canada Colonization Association
when a total of 427 families were
settled on 50,803 acres, said W. R.
Dick, superintendent of land settle-
ment for the province, at a meeting
in Calgary recently.

The first of the Canadian Pacific
Railway broadcasts took place
February 21 over CKAC from
Montreal and CKGW from Toronto,
and will be repeated every Friday
thereafter. These stations were
linked over Canadian Pacific tele-
graphs which allow the use of tech-
nical improvements brought into
use for the first time. Running
from 10 to 11 on the nights of
broadcasting the concerts will be
made up of light symphony orches-
tral pieces and renderings of light
and ballad opera music. The ser-
ies will be built up to the slogan of
"Cheerful and Good" and the or-
chestra will be under the leader-
ship of Rex Battle, a conductor
whose brilliant work has won wide
popularity. Sea chantey music and
French-Canadian and other folk
songs will also be featured.

Appointment of L. C. McQuat, one
of the Dominion's leading agricul-
turalists, as general agricultural
agent of the Canadian Pacific Rail-
way, announced recently, is further
evidence of the railway's interest
in the development of Canada. Mr.
McQuat has had 15 years' experi-
ence in agricultural and livestock
affairs and enjoys the distinction
of having represented Canada on an
Imperial committee to study the
meat supply of the British Empire.

You can depend on advertised products

Advertising is the most powerful searchlight known to business.

It focuses the attention of a community or a continent on a par-
ticular product. It gives that product the advantages of a widespread
test by the buying public. But it cannot persuade that public to
buy any article it has tested and found wanting. Manufacturers and
merchants know this. They know also that advertising an unworthy
product does only one thing: It brings magnified attention to its
deficiencies. Therefore, before they undertake extensive or consist-
ent advertising, they make sure that their product is right.

Consistent advertising is your best assurance of value and
worth. It is fair evidence that the advertising is offering a good
product which has been thoroughly tested and approved.

THE ADVERTISEMENTS IN THIS NEWSPAPER HAVE BEEN
PASSED BY THE HIGHEST AUTHORITY—
THE BUYING PUBLIC.

The Only Larks in America

Fifteen minutes car drive from the Empress Hotel,
Victoria, is the only colony of skylarks on the
continent of North America. This sweetest of all
songsters, of whom Canadian children read in all
anthologies of British poetry, but which they have
never seen or heard in actual life in their own coun-
try, save in this one section of the Dominion, has
been acclimatized at Victoria successfully. They are

to be found in considerable numbers among the oaks
to the north of the city, on the slopes of Mt. Tolmie,
at the Colwood Golf course, among the orchards of
Gordon Head, in the deep meadows near Elk Lake,
and from the flower-scented grounds of Butchart's
Gardens. Photographs show the Gardens with inset
of the English skylark.

Who Does Your Printing?

All business houses need more or less printed matter, all of which
is within the possibilities of the local printer. Yet how prone
many are to pass up the home printer and let the orders go to
city offices which have no interest whatever in rural communities
except to get printing orders and the cash to pay for them. Busi-
ness men, remember that the home paper is constantly promot-
ing the interests of the home community and you owe it to your-
self and your local paper to back up these efforts by at least hav-
ing your printed matter done locally.

Stops a Cough In One Night

A cough may be Catarrh with a dry tickling in the throat, it may be accompanied by partial stoppage of the nostrils and shortage of breath. Often there is a gagging in the throat, and every cough tears and hurts.

Coughs have a hundred different causes, yours may be due to any of the following:

| | |
|--------------------------|------------------------|
| Asthma | Inflamed Throat |
| Exposure | Bronchitis |
| Enlarged Tonsils | Pneumonia |
| Inflammation | Croup |
| Stomach Disorders | Pleurisy |

One remedy upon which physicians are relying today is Catarrhazone. It removes the cause of the cough, doesn't smother it.

It's simply wonderful to think how quickly a bad throat or catarrh can be helped with Catarrhazone. Its rich balsamic vapor is carried along with the breath to the innermost recesses of the lungs, bronchial tubes and chest, making it impossible for the germ of Catarrh to live. Thus soreness in the chest is at once alleviated—phlegm is loosened and ejected from the throat, old standing coughs are removed.

REMEMBER THIS, you breathe Catarrhazone and it will alleviate coughs, colds, catarrh, and weak throat. Large size, guaranteed, costs \$1.00, and lasts two months; smaller sizes, 25c. and 50c. Beware of imitations and insist on "CATARRHAZONE."

WORLD HAPPENINGS BRIEFLY TOLD

On its annual arctic cruise, this summer, the S.S. Beothic will endeavor to reach Melville Island, situated 360 miles beyond the most westerly point yet reached by steamship.

Prominent railroader, pioneer of the West, and veteran of the Riel rebellion, W. H. Tompkins, 68, died recently at his home in Winnipeg. He was captured and held prisoner at Batoche, Sask.

Rt. Hon. Montagu Norman was re-elected governor of the Bank of England. This makes the eleventh year in which he will fill the office of governor to which he was first elected in 1920.

J. R. Nesbitt, of Shoal Lake, prominent dairyman, has been granted an honorary diploma from Manitoba Agricultural College. The honor follows the established custom of honoring each year one outstanding man in Manitoba's agriculture.

In a motion adopted by city council, of Toronto, police commissioners have been asked to prohibit the operation of a "bad and doubtful debt" collecting car, whose driver, clad in a brilliant uniform, with his gaily decorated car parked in front of homes of debtors, drew a good deal of unwelcome attention.

Ralph Hull and Ralph D. James, of Vancouver, students at the University of British Columbia, have been awarded mathematical scholarships, valued at \$1,000 each, by the University of Chicago. These are the first awards of the institution to Canadian students who plan to specialize in mathematics.

As a vermifuge an effective preparation is Mother Graves' Worm Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Many Uses For Spruce

The wood of all Canadian spruces is tasteless and odourless, making it valuable for food containers. It is also in great demand for musical instruments, principally for organ pipes, piano sounding boards, violin backs, etc.

Seventy pieces of wood go into the making of a violin.

Dandruff

You needn't be bald. Minard's kills Dandruff, checks falling hair, stimulates new growth and adds a healthy gloss. Rub into scalp with finger tips, four times a week.

W. N. U. 1833

SUNDAY SCHOOL LESSON

APRIL 20

JESUS TEACHING FORGIVENESS

Golden Text: "Forgive us our debts, as we also have forgiven our debtors."—Matthew 6.12.

Lesson: Matthew 18.15-35.

Devotional Reading: Psalm 32.1-7.

Explanations and Comments

How To Treat Offenders, verses 15-20.—Jesus' parable about the Good Shepherd, illustrating His care for those who go astray (our last lesson), is followed in Matthew's Gospel by His counsel in regard to man's treatment of offenders. He advised His disciples first to tell the offender of his fault, then to rebuke him in the presence of two or three others, and then, if he still gave no heed to their words, to tell his offense to the Church. "When two or three are gathered in My name," he added, "there am I in the midst of them."

Unlimited Forgiveness, verses 21, 22.—Peter's question about forgiveness of offenders naturally followed: "Lord, how often shall my brother sin against me, and I forgive him? until seven times?" Seven denoted the perfected number. Peter's heart glowed with self-complacency, for was he not ready to go much farther in forgiveness of the ordinary man? Did not the Talmud say: "When a man sins against another, that other forgives him once, he forgives him a second time, he forgives him a third time, but the fourth time he does not forgive him?" "No, I tell you, Jesus answered, 'not until seven times, but times without number, until seventy times seven.' Magnanimity is not calculating, there is no place for arithmetic in the grace of forgiveness, or, as Dr. Jowett poetically says, 'forgive to a number where the scaling power of arithmetic retires with wearied wing.'"

Peter himself was an illustration of the grace of unwearied forgiveness. He sinned, and sinned, and sinned again. Dr. J. D. Jones fancies Peter after Christ's death saying to himself, "O to grace, how great a debtor, daily I'm constrained to be," and again and again taking himself as a text and preaching a sermon of comfort and hope to downcast and despairing souls.

"O Man! forgive thy mortal foe,
Nor ever strike him blow for blow;
For all the souls on earth that live,
To be forgiven must forgive.
Forgive him seventy times and seven;
For all the blessed souls in heaven
Are both forgivers and forgiven."
—Tennyson.

Heart and Nerves Caused Her To Have Cold Hands and Feet

Mrs. Joseph Price, Red Pine, N.B., writes:—"Several years ago I was troubled with my heart and nerves and was so bad, at times, my hands and feet would become numb and cold."

"I happened to see

advertised and started taking them at once. I continued for some little time, and since then I have had no return of my trouble."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Doctor: Your throat is in a bad state. Have you ever tried gargling with salt water?

Sailor: Yes, I've been shipwrecked a dozen times.

Persian Balm. Cool and refreshing. Soothing and protective. The perfect aid to beauty. Unrivalled in its softening and beautifying effect on the skin. Imparts a fresh and fragrant charm to the loveliest complexion. Banishes roughness caused by weather conditions. Safeguards the skin and keeps it smooth, soft and flawless. Use it for the hands and face. Always results in the highest expression of beauty.

Income Tax Collections

A total of 137,101 persons paid income tax during the fiscal year ended March 31st, 1929, and the sum collected was \$38,422,323.25, the largest amount yet gathered in by the Federal authorities. In 1926 there were 215,277 taxpayers who paid in \$55,571,961.57.

Strengthening Butter Boxes

Recent tests on butter boxes at the Forest Products Laboratories, Department of the Interior, showed that one wire applied around the centre of the box doubles its strength.

Minard's Will Stop That Toothache.

DO YOU SUFFER WITH HEADACHE?

So easy to get quick relief and prevent an attack in the future. Avoid bromides and dope. They relieve quickly but affect the heart and are very dangerous. They are depressing and only give temporary relief, the cause of the headache still remains within.

The sane and harmless way. First correct the cause, sweeten the sour and acid stomach, relieve the intestines of the decayed and poisonous food matter, gently stimulate the liver, start the bile flowing and the bowels pass off the waste matter which causes your headache. Try Carter's Little Liver Pills. Druggists 25c red pkgs.

Carloads Of Horses

Animals Being Assembled At Moose Jaw For Spring Work

Under the management of the Saskatchewan Co-operative Live Stock Producers, Limited, the horse marketing section of that organization is undertaking to assemble carloads of horses at the Moose Jaw yards in readiness for spring work. With the aim of improving the condition of these horses they will be fed for a few weeks before offered for sale. This affords buyers an opportunity to visit the yards and select their teams.

Asthma Cannot Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy assuredly deserves this exalted title. It has its credit thousands of cases which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma is needless when a remedy like this is so easily secured.

Does Away With Noise

Contractors In London Use Silencer On Road Drill

Equipped with a silencer which eliminates more than half the noise and much of the vibration, a pneumatic road drill attracted much attention when exhibited recently in London. It was made for the use of contractors who meet with protests against the noise made by the ordinary drill exhaust. The silencer, clustered around the centre of the drill, are designed on the principles of the motorcycle silencer.

Will Combine Exhibits

Saskatchewan, Manitoba and Alberta will combine their exhibits at the World's Poultry Congress to be held in London, England, next July. The exhibit will occupy a frontage of 36 feet and will be the largest of the provincial exhibits.

Experiment a Success

Complete Newspaper Page Sent By Radio From San Francisco To New York

The complete front page of a newspaper has been transmitted across the country by radio for the first time.

Giving the present a peep into what may be commonplace in the future, engineers of the General Electric Company at Schenectady, N. Y., reported that successful experimentation had permitted them to read the first page of the San Francisco Call-Bulletin three hours after it had left the press. It was reproduced in full size in the laboratory of a new type automatic carbon receiver, connected to short wave receiving equipments actuated by signals originating 2,000 miles away.

The engineers did not hesitate to forecast many possibilities for this improvement in facsimile transmission, which, while still in a highly experimental stage, gave an indication that some day radio may be delivering a large part of business mail and may also bring daily newspapers directly into the home.

Canada's Oldest Men Dead

Within a period of less than three weeks death claimed the two oldest men in Ontario, and two of the oldest in Canada. James Wilson, 109-year-old negro, died at his home in Welland, Ont., and two weeks later at St. Joseph's hospital, Peterboro, James Hendley, of Peterboro County, died in his 109th year.

Inquiry by experts of the Mayo Foundation indicates that rheumatic persons can "sense" the approach of rain.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

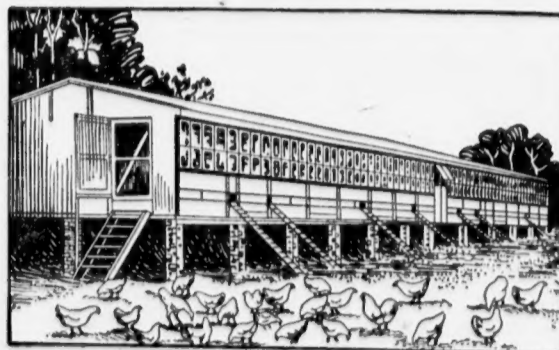

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN
YOUR LOSSES

SAYS BRITISH NAVAL POLICY IS DANGEROUS

London, England.—Great Britain's war-time first sea lord, Admiral Lord Wemyss, said recently that Great Britain's future as a maritime power was fraught with grave possibilities under the present naval policy and other policies of the government.

Making the presidential address at the Institute of naval architects, Lord Wemyss pointed to the reduction of 46 per cent. in the British naval estimates as compared to 1914 "concurrent with an enormously increased national budget."

"Is this backbone of British industry and national defence," he asked, "to be sacrificed in order that doles and pensions shall be provided on a more magnificent scale to those who, in many cases, might be usefully employed in developing empire resources and helping to protect our interests overseas?"

"Let us hope that the reaction, which must inevitably come sooner or later, toward fuller realization of our naval requirements may find us with the power to act before our national resources in men, money and material are irretrievably lost through a policy of mistaken confidence and extravagant expenditure in unprofitable channels."

The suggestion was made in parliament recently that the admiralty should take opportunity of the presence in London of Dominions' naval delegates, to discuss the question of revising the contributions of the Dominions to Imperial naval defence. Hon. C. G. Ammon, secretary to the admiralty, said the question is more appropriate for the Imperial Conference.

H. Ramsbotham (Cons., Lancaster), who had raised the matter, insinuated the real reason for not discussing the question was that the British Government had "pinched" the contributions of those Dominions interested in the Singapore naval base, by announcing work had been slowed down on this base without saying anything about return of the money contributed. Mr. Ammon did not reply to this.

"While all the self-governing communities of the British Empire have an equal claim on the protective role of the navy, they take widely varying views of their obligations towards the cost of Imperial defence," remarked the Weekly Review, Truth, recently.

The statement was provoked by study of the memorandum on respective contributions of Great Britain and the Dominions, released by the first lord of the admiralty last week. This showed the expenditure per capita in Britain was \$5.96; Australia, \$1.83; New Zealand, \$2.47; Canada, 37 cents; South Africa (white only), 22 cents.

An even more striking manner of expressing these inequalities is the proportion of expenditure on naval defence to the value of the import and export trade protected," Truth continues. "The moral seems to be that neither Canada nor South Africa think there is the faintest prospect of another naval war, and that it is only wasting money to provide against it."

Unemployment In Ontario

Ottawa.—That there are nearly 40,000 unemployed men and women in the province of Ontario, or double the number registered at the same time last year, was the statement by General Superintendent H. C. Hudson, of the provincial employment services, who concluded an investigation into conditions.

Will Attend Passion Play

Oberammergau.—Prime Minister Ramsay MacDonald, of England, has ordered tickets for himself and family for the Passion Play to be presented here this summer.

Duchess Takes Up Aviation

London, England.—The Duchess of Bedford, who is 65 and an aviation enthusiast, made her first solo flight in her own baby plane at her home, Woburn Abbey, Bedfordshire.

Spain is preparing to take a national census next spring.

W. N. U. 1833

For Royal Ranch

Shipment Of Thoroughbred Stock Arrives From England

Saint John.—Seventy head of the finest thoroughbred stock arrived here from England destined to go forward by the Canadian Pacific Railway to the Prince of Wales' ranch in High River. This is the first shipment made to the ranch for four years, and great care has been taken by Professor Carlyle in his selection of the animals to secure the very finest types.

"The 40 pedigreed Shorthorn cattle, all of which have passed the extreme tuberculin test, are quite the best shipment that has ever been brought to Canada in my experience," Professor Carlyle said. They represent purchases made from some of the most famous Scottish and English breeders as well as a selection of nine two-year-olds and three yearlings, heifers from the home farm at Stroke Climsland, Cornwall, which are of the Prince's own breeding.

These heifers are of certain notable Shorthorn families not at present represented on the ranch.

Included in the contingent are 30 Hampshire Down sheep, three of which were prize-winners at every agricultural competition in which they have appeared. These are to improve and supplement the herd on the ranch at present, which has enjoyed such success, rams having been sold and supplied to ranches from Texas to the Peace River.

Peace Memorial Park

Money To Be Raised By B.C. School Children Donating Ten Cent Pieces

Vancouver.—Money subscribed in ten-cent pieces by the school children of British Columbia will be devoted to laying out of a peace memorial park on the Canadian side of the Peace Arch at the international boundary between British Columbia and the state of Washington. It was decided at a meeting here of the International Peace Memorial Association.

The United States end of the Pacific highway is being diverted to the Peace Arch, and the Department of Public Works, at Victoria, is changing the Pacific highway from its present position to the right-of-way to the arch.

The work of the International Peace Memorial Association will be to establish a magnificent park area on the Surrey side of the line. The Dominion Government has agreed to turn over certain lands there for a park.

Eastern Canada Interested

Ontario Grain Growers Plan To Enter World Grain Show

Toronto, Ont.—Eastern Canada grain growers have already started plans to enter the world grain show at Regina, still two years away.

A few smattering prize lists which have found ways into agricultural centres here have resulted in a flood of requests for more and these requests are being communicated to the Regina promotion headquarters.

Seven of the leading grain growers of Perth County, two of them consistent winners in Ontario competitions, recently declared at Stratford that they have already started developing seed for the world show. Middlesex farmers have also started organizing.

Might Take Canadian Lumber

Ottawa, Ont.—A party of British Columbia manufacturers, who recently visited Australia and New Zealand, have been in conference with Hon. James Malcolm, Minister of Trade and Commerce, and said a friendly attitude to Canadian products was observed and it is believed that if a revision of the Australian trade agreement was considered, Australia might be prepared to give a preference to Canadian lumber.

Floods Threaten Manitoba Farms

Winnipeg, Man.—Rising river-levels west of Winnipeg, forced farmers to resort to dynamiting ice-jams in an effort to obtain relief from threatened floods. Sudden mounting of the level of the Assiniboine River at Poplar Point, about 40 miles west, promises to immerse miles of farm land unless the ice is allowed to flow free.

VISITS BIRTHPLACE

Mrs. Almee Semple McPherson, noted evangelist, who, heading her pilgrimage to the Holy Land, stopped at London, Ont., her birthplace, to mark a ballot showing how she would determine six contentious problems of the day.

Canada's Relations

With Russia

Are Very Similar To Those With Other Countries

Ottawa.—Diplomatic relations between Canada and Russia are similar to those existing between the Dominion and other countries with the exception of those countries in which Canadian legations are located. This statement was made in the House of Commons by Premier Mackenzie King. Russia, the prime minister stated, had enjoyed certain special diplomatic privileges which had been discontinued several years. The result of the discontinuance of these special privileges, Premier King stated, was that relations with Russia, diplomatically, were on the same footing, as with Austria, Italy and such countries. A Canadian desiring to go to Russia, the prime minister remarked, could secure his passport in Ottawa, and have it vised by Russian authorities.

Miners Will Not Strike

Lethbridge Men Decide To Apply For Board Of Conciliation

Lethbridge, Alberta.—There will be no strike in the Lethbridge minefield. The result of a vote announced at a meeting of the miners was 278 for conciliation and 142 for strike action.

The miners will now apply for a board of conciliation under the Lemieux Act to consider their demands, which include a small increase in wages and recognition of the Mine Workers' Union of Canada.

New Fuel Oil For Planes

Hartford, Conn.—A new device for an aeroplane motor which permits use of all grades of fuel oil has been successfully demonstrated by the Pratt and Whitney Aircraft Company. The device eliminates the usual carburetor and intake system of the gasoline engine by a new system of direct fuel injection.

National Fuel Policy

Matter Brought Up In House Of Commons In A Series Of Questions

Ottawa.—The question of a national fuel policy for Canada is being brought up in the House of Commons in a series of questions propounded by T. L. Church, (Cons., Toronto Northwest). Mr. Church enquired:

"1. What steps have been taken to carry out a resolution which passed the House of Commons in 1926-27 for a national coal supply for Canada by which all coal would be mined and coked under the British flag, whether from Wales, Nova Scotia or Alberta?"

"2. Has the attention of the government been called to allegations made 'of sweated labor' regarding coal for Canada from Russia made in the House of Commons, London, on April 7, by Sir Newton Moore, (Richmond)?"

"3. What steps does the government propose to take regarding contracts for Russian coal coming into Canada to insure the carrying out of the terms of the aforesaid resolution for a national coal supply, and to prevent Russian coal displacing shipments of Welsh anthracite?"

"4. Is the government aware that 25,000 tons of Russian coal have recently been sold to a Montreal firm, displacing coal mined and coked under the British flag?"

Shipped As Waste Paper

Large Liquor Cargo Seized At Niagara By U.S. Customs Officials

Niagara Falls, Ont.—A carload of waste paper, billed from Port York, aroused the suspicions of United States customs officials across the Niagara River. Working on the theory waste paper is not shipped such distances, the officials opened the car and discovered more than 1,000 cases of rare wines and cordials, hidden under the layer of waste.

The liquor was dumped into the river from the lower bridge to the great delight of boat owners. Word quickly spread that liquor was being thrown over and many persons rowed down under the bridge and salvaged bottles which had not broken.

Natural Resources Bill

First Reading Of Bill To Ratify Agreement With Saskatchewan

Ottawa.—The bill to ratify the agreement between the Dominion Government and the Government of Saskatchewan, transferring the unalienated natural resources of Saskatchewan to the provincial government was introduced in the House of Commons recently and given first reading. The only difference between this agreement and the one made with Alberta, Hon. Charles Stewart, Minister of Interior, explained, was a clause providing for submission of certain questions to the courts. This litigation will not delay the transfer of the resources. They will be handed over as soon as the agreement is ratified by parliament and approved by the Imperial parliament.

Distinguished Visitors

Rt. Hon. Lord Eusatie Percy, seventh son of the seventh Duke of Northumberland, and president of the Board of Education in the Baldwin ministry, accompanied by Lady Percy, is shown here on board S.S. Duchess of Atholl, at Saint John recently. The distinguished couple are on a visit to Canada and the United States, where Lord Percy will inaugurate a series of lectures at Yale University on Anglo-American relations.

WAR VETERANS ALLOWANCE ACT IS ENDORSED

Ottawa.—Broadly speaking, the ex-soldiers' organizations of Canada endorse the War Veterans' Allowance Act, which provides for granting to unemployable ex-service men a certain monthly allowance at the age of 60, said Lt.-Col. L. R. La Fleche, president of the Canadian Legion, to the special parliamentary committee on returned soldiers' problems. The bill provides for considering the "burned out" veteran, who is wholly unemployable, eligible for the grant before he has reached 60 years of age.

What was anticipated as a contentious matter was the clause which establishes a departmental committee, under direction of the minister, to control the operation of the act. The minister of pensions, Dr. J. H. King, informed the committee that on this departmental body the veterans would have an honorary member and also honorary members on the various district boards.

Col. La Fleche, speaking on behalf of the veterans, declared that this new provision would be satisfactory inasmuch as it would enable the ex-soldier organizations to keep in touch with the decisions of the committee. He said that the veterans desired it to be made clear that this bill should not have any bearing on the provisions of the Pensions Act.

New Trade Relations

Germany To Cultivate New Markets With Adjoining Countries

Berlin.—Cultivation by Germany of closer commercial relations with her eastern and south-eastern neighbors, possibly at the expense of present trade relations with Canada and the United States and Argentina, was urged by Herman Dietrich, vice-chancellor and minister of economics.

He mentioned that the adverse trade balance with Canada was 216,000,000 marks, with the United States, 796,000,000 marks, and with Argentina, 370,000,000.

"They send us their surplus agricultural produce but decline to buy from us to the same extent. Consequently, readjustment of our commercial relations with the border states is perhaps the most important task of Germany's economic policy, and this applies especially to Poland and Rumania," he said.

Colonel Ralston Is Returning To Canada

Hon. Philippe Roy Taking His Place At Disarmament Conference

London, England.—Col. the Hon. J. L. Ralston, head of the Canadian delegation to the naval disarmament conference, with Mrs. Ralston, have sailed on the steamship "Berlin" for Canada. The liner sailed from Southampton for Halifax, where it is due to arrive April 18.

Col. Ralston's place will be taken by Hon. Philippe Roy, Canadian minister at Paris. Pressure of parliamentary duties and work in his department of national defence necessitates the return of the Canadian cabinet minister.

Suggests Pensions For Blind

D. B. Lawley Advocates Aid For Those In Isolated Areas

Ottawa.—Pensions for blind persons living in isolated parts of the country were advocated before the Canadian Federation of the Blind by D. B. Lawley, travelling secretary of the organization.

There are 7,000 sightless persons in Canada, he said, the majority of whom lost their sight after reaching 35 years of age. The handicap, he explained, weighed much heavier on those living in rural areas. He recommended setting up federal and provincial advisory committees to deal with the welfare of these unfortunates.

New Post Office For Brandon

A permit for \$130,000 has been issued to cover the erection of the new post office in Brandon, for which excavation work has begun.

Practice Of Inoculating Seed Of Various Legumes Has Been Found To Be Beneficial

During the past few years practically all Ontario farmers have come to recognize the value of inoculating the seed of the various legumes when they are being grown on land which has not previously been sown to these crops or on land where their cultivation has lapsed for a period of years. This practice has proven a good one and is now used in every progressive agricultural country of the world, but the discovery of a proper method of getting the inoculation or culture to the farmer was not done in a day and the history is rather interesting.

The first efforts in this direction were made in Germany where samples of the soil which had been used for growing the legumes was transported to the virgin soil and there spread around to insure the presence of the bacteria. The disadvantages of this method were obvious and a commercial company sold a large number of prepared cultures which were found to be valueless. Agricultural colleges and experiment stations in the various countries worked on the problem for a number of years; at one time the Department at Washington believed they had a successful method of growing and sending out the bacterial cultures, but it proved a failure.

It remained for the Department of Bacteriology at the O.A.C. to devise the proper method and the culture advised was soon adopted as the one best suited for the work. The familiar bottle, half filled with a white substance is the outgrowth of this discovery and the bacteria on this culture will live almost indefinitely. Each legume has its own particular culture and the one that is supplied for alfalfa is of no value for inoculating red clover and vice versa. Since the discovery, the Department of Bacteriology has supplied something over 100,000 cultures to farmers requesting them at a nominal charge of fifty cents.

A question frequently asked is, when is inoculation required and for what crops? The common crops requiring inoculation are alfalfa, red clover, sweet clover, peas, field beans and soy beans. Inoculation should be practiced where the crop is to be grown on soil that has never before produced that particular crop and in general if it has not produced a good yield of the said crop within the past four or five years.

The Department have not claimed unfailing increases after the use of the inoculant, it has been generally assumed that in about seventy cases out of every hundred there will be a substantial increase and reports have shown that in the case of the other thirty per cent. the bacteria were probably already in the soil and the inoculation thus rendered unnecessary.

It is interesting to note that rich soils which are very high in nitrogen will often produce good crops of legumes for the first time without inoculation. The reason for this is that the bacteria used in inoculating have as their function the converting of the nitrogen of the air into a form which the plants can use and in nitrogen rich soils the soil nitrogen is used when the bacteria are absent, thus seriously depleting the soil but not giving any noticeable effect on the plant.

"I sent a letter to have my character told from my handwriting."
"What was the result?"
"Your letter shows that spelling is not your strong point." — Buen Humor, Madrid.

Would Curtail Production

Effort Made To Reduce Spring Wheat Planting In United States

Two United States government preachers of the gospel of curtailed production as the only real salvation of wheat farmers made ready in Chicago to speed over the great spring wheat area of the northwest in a last-minute effort to forestall the planting of wheat on at least 2,000,000 acres.

The two men were Dr. John L. Coulter, chief economist of the tariff commission, and James Howard, federal farm board representative and former president of the National Farm Bureau Federation.

Their final plans for the intensive campaign by which they hope to reduce spring wheat acreage by 10 per cent., were made in conference recently with Alexander Legge, president of the Farm Board.

(By Annebelle Worthington)

It's typically sports! A charming wearable type that adapts itself to all the season's new fabrics. Several dresses may be made from this Style No. 2841 and each one appear entirely different. It is sketched in wool jersey in chartreuse green, with dash of soft bow tie and suede belt. Applied neckband gives smart finish to becoming collarless Vionnet necktie. It comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Orange-red or violet blue silk crepe is effective to complete ensemble.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Serious Problem For Cattle Committees

Herdsmen Said To Be Resorting To Knife and Needle For Show Ring Purposes

The Farmers' Advocate says: Cattle committees who outline the policy and lay down the rules which govern exhibitions in Canada are giving earnest thought and consideration to the serious problem of detecting and barring "doctored" cattle. The large exhibitions, both East and West, realize that something must be done to prevent the public being hoaxed by super-expert herdsmen who are able to use knife and needle in beautifying their cattle. It is a practice that should be neither condoned nor permitted and the fair boards are acting wisely in their attempt to ban the doctored animal and the exhibitor who offers such animals for competition.

One suggestion is that all cattle be inspected by a veterinarian before entering the ring. This entails much unnecessary work, and any animal found tampered with would simply be led back into the stable to be presented at future shows or exhibitions held elsewhere. It becomes necessary to inspect only a few cattle, the champions and reserve champions, and the fear of exposure after winning such honors would deter any exhibitor from going to undue lengths in treating or preparing his animals for the show-ring. It is not the cattle that win third, fourth or fifth place in a class, or are outside the prize money altogether, about which a fair board needs to worry. Not one in a hundred of them receive more than ordinary fitting. It is the cattle that are winning high honors in the show-rings of Canada and the United States that need watching. Neither do we wish to imply that all cattle that win championships are dishonestly fitted or treated. Many breeders and exhibitors would condone no such practice; but it is known that herdsmen are resorting to the knife and the needle, and fair boards cannot overlook the fact.

Information Wanted

Mrs. Newlywed: "Oh, I wish these recipes would be more definite."

Mr. Newlywed: "What's the difficulty, my dear?"

Mrs. Newlywed: "Well, this one tells how to use up old potatoes, but does not say how old the potatoes must be."

The cougar, while very aggressive among the lower animals, exhibits an intensive fear of mankind.

State Of Canadian Business Is Fair In Comparison With Conditions In Other Countries

A Good Slogan

"An Acre Of Alfalfa For Every Cow" Takes On New Meaning

"An acre of alfalfa for every cow" is a slogan adopted in many districts where live stock is kept, and with modification to suit local requirements it is one which receives strong support by the Dominion Department of Agriculture. With the short crops and difficult seasonal conditions of 1928 and 1929, the need of adequate provision with respect to fodder crops became more apparent. Not only will the application of this slogan to alfalfa, or suitable clover or hay crops, go far to meet the urgency of the present situation, but it would also provide a useful and profitable rotation medium for keeping soil up to production capacity and assist in weed control. This scale of planting not only provides adequate pasturage but allows a surplus for feeding to other farm animals and often provides a carry-over of hay to a lean year.

More Milk Is Used

Consumption Per Capita Has Practically Doubled In Canada

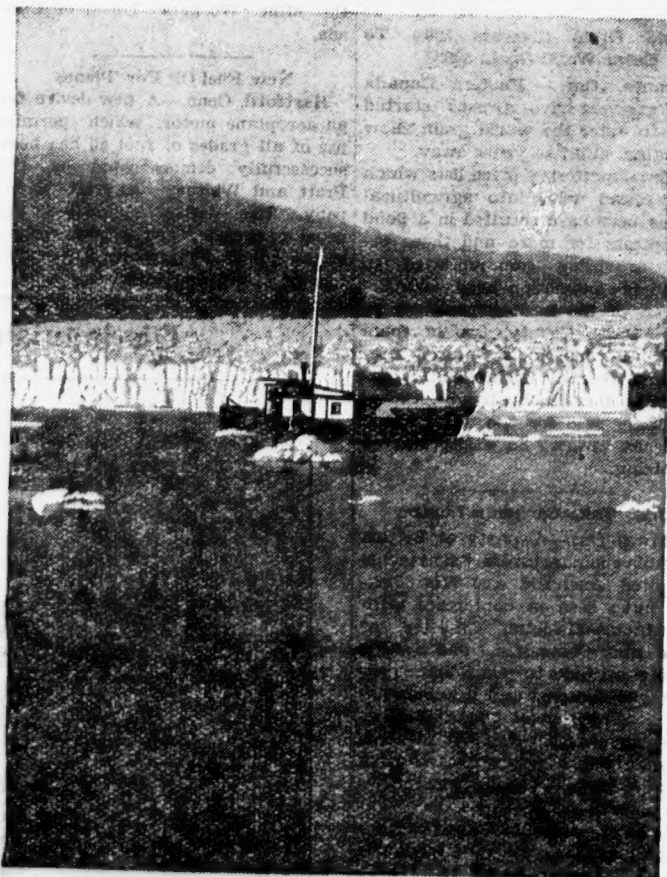

During the past eight years domestic milk consumption per capita has practically doubled in Canada. The Dairy and Cold Storage Branch of the Dominion Department of Agriculture attributes this increase to the growing demand of the sweet milk trade and to increasing popularity of ice-cream. Canada's exports of dairy products have declined materially, and this has been due in part to the increasing domestic consumption and in part to the large numbers of high quality milk cows which have been sold to United States buyers and gone out of the country. In this connection it is noted that there were approximately 100,000 fewer good milk cows in Canada in 1928 than there were in 1927. Canadian dairymen are realizing the economic danger of the situation, however, and few sales of high grade milk cows are now reported.

"Mother, isn't your hair permanently waved?"

"My dear, what makes you ask such a thing?"

"I've been thinking. Why can't I have my neck permanently washed?"

THE TAKU GLACIER

This ice field, one of the largest in the world, is one of the many wonders which are to be seen on the route of the Canadian National Steamships between Vancouver and Skagway, Alaska. All of the three boats in this service, the "Prince George," "Prince Rupert," and the new "Prince Henry," pass within a stone's throw of this glacier, the height of which can be judged by the fishing smack in the foreground. The glacier is 90 miles long and only about one-quarter of its width is shown in the photograph.

Whilst the state of Canadian business is uneven and may be regarded as disappointing compared with that of a year or two ago, it is fair in relation to world conditions, declares the monthly commercial letter of the Canadian Bank of Commerce. Canada's unemployment problem, though by no means negligible, is not nearly so acute as in some of the older countries, the letter points out.

During the month of March business conditions showed a gradual accession in industrial and construction operations, which tended to offset unsettlement in other branches of commerce, says the bank's letter.

"We have mentioned before that the reduction in agricultural purchasing power would leave its mark on the economic structure and this has proved to be the case. Until the farming community experiences favorable weather and market conditions, business as a whole will continue on a smaller scale than in the four preceding years. However, Canada is fortunate that capital expenditures on development projects continue in large volume."

In the matter of European trade the bank's letter remarks that with the prospect of further substantial progress, Europe seems to offer good opportunities as an export market for those Canadian commodities which require an expanding market owing to Canada's increased productive power.

Prairie Cattle For Peace River

Cannot Procure Right Type Of Cattle In British Columbia

The cattle suitable for sale on easy terms to settlers in the Peace River district have been found on prairies and will be purchased there shortly, Hon. William Atkinson, minister of agriculture, announced on his return to Victoria from a prairie tour. "There may be some surprise that we are not securing these cattle in British Columbia for our northern settlers," said Mr. Atkinson. "The fact is that we cannot secure here the type of cattle which these people must have for their conditions. What is required is a general purpose animal. Our fine dairy cows would not endure the cold there. It is necessary therefore to secure such cows as are to be found on the prairies only at this time."

Mr. Atkinson proposes to send experts of his department to the prairie shortly to select the animals which will be moved north in May to Peace River people. Probably about 150 animals will be sent this spring.

Ten Thousand Stings By Mail

Now Possible To Send Package Of Bees By Mail

With the improved technique which has been developed for the handling of package bees it is now possible to send them by mail, and the bee experts of the Dominion Department of Agriculture find that very satisfactory results are obtained by apiarists through the use of package bees to replenish weakened colonies and to establish new ones. The bee package is a wire-covered wooden frame work, usually containing two pounds of live bees. There are some five thousand bees to a pound. A shipment by mail is now possible and should a package of bees become broken open in transit ten thousand stings is the potential result.

"I hear your brother has married his deceased wife's sister?"
"Yes, he wanted another wife, but not another mother-in-law." — Karik, Aturen, Oslo.

CHAPTER VIII.—Continued

The girl laughed, handed him "Cabot's Diagnosis," and wiped the top of her great-grandfather's desk with the dust cloth, as she replied: "I was merely considering the fact that it may have caused Jim Bennett to use his own brains—instead of his mother's."

The doctor pondered for a moment while Charmian watched him, a smile hovering on her lips.

"I begin to see light in the darkness," he said at last. "Your friend Bennett, I gather, possesses a forceful maternal relative who prefers, let us say, the mail-order variety of goods, to the honest home-made product. She must be mentally unbalanced."

Charmian's smile widened, but she flushed also, a fact that did not escape the watchful eye of her companion.

"You are too clever for an unsophisticated country maid," she said. "You mean, 'provincial,' don't you?" he retorted, grinning.

She laughed.

"I had almost forgotten that terrible appellation. Poor Grandma! How it did trouble her. There! This place would look just right if we had a rug before your desk, and a couple of old brass candlesticks on the mantel. And we must shine up the andirons. An antique dealer from Eastboro wanted to buy them, and Grandma would have consented if I hadn't arrived in the nick of time. She argued that they weren't doing us any good out here, and that the ten dollars the man offered—"

"Ten dollars!" broke in the doctor. "He was a shark!"

Weak After Operation

"I was very weak after an operation. My nerves were so bad I would sit down and cry and my husband would not go out and leave me alone. Now my nerves are much better, thanks to a booklet that was left under the door. Lydia E. Pinkham's Vegetable Compound surely put me on my feet. I have taken eight bottles. My friends tell me I look fine. My sister has taken this medicine too."—Mrs. Annie Walton, 67 Stanley St., Kingston, Ontario.

"Good work!" he said. "A widow woman and six kids ought to be a bargain at a dollar!"

CHAPTER IX.

When Deacon Purdie arrived promptly at two o'clock that afternoon and found Grandma Davis seated placidly in her chair by the window, he little guessed that there were two eavesdroppers in the next room. If Grandma herself was suspicious of the fact, she ignored it, and greeted the deacon with a guileless and deceiving smile. Though a shrewd business man as a rule, he didn't suspect that at this juncture of his fifth venture into matrimony, he had met his equal in a deal.

"Have you got 'em?" he questioned anxiously, as he stood hesitating in the doorway.

"The beads?" asked Grandma innocently. "Sit down, Edgar, and rest yourself a minute. You look as hot as tophet. You've got some new shoes, haven't you? I heard the squeak when you came up the steps. I guess you bought 'em at Earl and Hovey's. My husband used to say that Elias Earl bought squeaky shoes to sort of advertise his business. When he'd go up and down the aisle on Sundays passing the contribution box, folks would hear the squeak and be reminded of what he had to sell. And you're wearing a new tie, too. Aren't you getting a little old for a red necktie, Edgar?"

The deacon cleared his throat, while one large, hairy hand sought the latest extravagance that adorned his neck.

"I like a bright tie, Grandma. Nothin' like dressin' sort o' snappy on occasions. Now those beads—"

"And yet," broke in Grandma heartlessly, "with poor Sarah only six months in the grave. . . ."

She sighed, and her caller, fidgeting a moment, replied sanctimoniously: "Do you consider it's Christian to mourn when our loved ones have gone to a brighter shore? Man was not meant to live alone, Grandma, or—or—well, about those beads." (He glanced uneasily at his big silver watch.) "I got a long ride before me, and—"

"Dear me!" smiled the old lady, "I was forgetting what you came for, Edgar. I hope you won't be disappointed, but only one strand came, though they're real pretty. Perhaps it'll be easier for you not to be obliged to make a choice. There!" Grandma lifted a satin-lined box from the broad window sill and held aloft, before the deacon's dazzled vision, a strand of yellow beads. "Aren't they handsome?"

Deacon Purdie hitched his chair a trifle nearer, and reached for the bauble—removed his long-distance spectacles, and scrutinized the proposed purchase minutely.

"Do they come high?" he questioned after a serious moment.

"That depends on what you expect to do with 'em," replied the old lady briskly. "If you were going to donate 'em to a church fair, say, why you might hesitate; but if they're a gift to a lady friend, or some dear, loved relatives, Edgar, why that's a different matter. They're worth two dollars."

"Two dollars!" he exploded, in genuine consternation. "Did you say two dollars, Grandma Davis, or have my ears deceived me?"

"Your hearing is all right, Edgar, and you can be thankful for it, too, a man of your age. Beads are stylish these days, and the price maybe a little bit inflated." ("Inflated!" murmured one of the eavesdroppers in the next room. "Gosh!") "And if—"

The deacon arose dazedly, reaching for his hat.

"It's too much to expect of a man, Grandma," he said regretfully. "I had no idea they come so high. Maybe I could use somethin' I got at home, or—"

"If it's for a present, Edgar," broke in Grandma soberly, "I wouldn't risk any second-hand junk from 'round the house. Now you look here, maybe we'll come to terms."

"I'd give a dollar for 'em," admitted

ted the deacon grudgingly, "though such a waste of money seems almost sinful, and not one cent higher will I go."

Grandma reached for the beads and began arranging them carefully on their satin bed.

"Well, I'm sorry, Edgar." Her tone was definitely final. "But you wouldn't want me to lose money on the transaction, would you?"

"What did they cost you, Grandma?" queried the deacon warily, and sat down again. "I—I might on a pinch give a dollar and a quarter."

Grandma sniffed.

(To Be Continued.)

Little Helps For This Week

"It is a good thing to give thanks unto the Lord, and to sing praises unto Thy name, O Most High."—Psalm 92. 1.

Seven whole days, not one in seven,
I will praise Thee;
In my heart, though not in heaven,
I can raise Thee.

Small it is, in this poor sort
To enroll Thee;
E'en eternity is too short
To extol Thee.

—George Herbert.

I think we are not as thankful as we ought to be; we are lacking in the spirit of praise. We are far too much given to complaints and wallings, and I do not think these can please our Holy Father. If you are seeking to help another here, are heaping benefits on any one, it is not cheering to listen to a ceaseless tissue of lamentations. God expects His blessings to be acknowledged, both temporal and spiritual.

—Archer Thompson Gurney.

WARNING TO MOTHERS

Watch the Health Of Your Little Ones At All Times

No mother can expect that her child will escape all the ills to which babyhood and childhood are subject, but she can do much to lessen the severity of these troubles. The mother should be constantly on her guard to prevent childhood ailments, or if they come on suddenly as they usually do, to have the means at hand to relieve them. Thousands of mothers have found Baby's Own Tablets the ideal remedy for little ones—thousands of mothers always keep the Tablets in the house as a safeguard against the sudden illness of their little ones.

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels; sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fever and make the cutting of teeth easy. The Tablets are absolutely guaranteed free from injurious drugs and may be given to the youngest child with perfect safety. They are sold by medicine dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Federal Responsibility

Argument In Favor Of Federal Aid For Transcontinental Highways

The prime minister is partly—and, Westerners believe, only partly—right when he tells the House that road building is a provincial responsibility. It could be proved by that bulwark of the Canadian constitution, the British North America Act, that road building is an affair for the provinces, just as the prime minister says. But the draftsmen of the act no more anticipated the coming of the automobile, than they anticipated, say, the entry of women into politics and parliament. Yet, while the market roads and the byways of travel are provincial responsibilities, surely, if the transcontinental railways are the concern of the Dominion of Canada, why not transcontinental highways, in these days of universal auto travel? — Calgary Albertan.

Miller's Worm Powders destroy worms without any inconvenience to the child, and so effectually that they pass from the body unperceived. They thoroughly cleanse the stomach and bowels and leave them in a condition not favorable to worms, and there will be no revival of the pests.

Polite To Foreigners

A movement has been initiated at Dresden, Germany, to have the school children of Saxony taught to be especially polite and helpful to all foreigners. Hotel owners and others interested in the tourist traffic are behind the movement.

Minard's is Best for Grippe.

WRIGLEY'S

Alertness scores everywhere.

Wrigley's creates pep and energy and keeps you alert.

A 5¢ package may save you from going to sleep at the wheel of your car.

Makes pep

"After Baby Came I Was Weak, Skinny, Gained 22 lbs."

"After baby was born I was very weak, skinny. Since taking Ironized yeast feel fine. Gained 22 lbs."—Mrs. Laura Benoit.

Thousands write new Ironized Yeast adds 5 to 15 lbs. in 3 weeks. Ugly hollows fill out. Bony limbs get graceful roundness. Muddy skin gets clear and rosy like magic. Nervousness, indigestion, constipation vanish overnight. Sound sleep, new pep from very first day.

Two great tonics in one—special weight-building Malt Yeast and strengthening Iron. Pleasant little tablets. Far stronger than unmedicated yeast. Results in half time. No yeasty taste, no gas.

So quit being skinny," tired, unattractive. Get Ironized Yeast from druggist today. Feel great tomorrow. Money back from manufacturer if not delighted with quick results.

A Japanese Discovery

Doctor Says Long Eyelashes Are Sign Of Weak Vitality

Long eyelashes are considered to add to the charm of a face. But they are, according to a Japanese physician, a sign of weak vitality. This doctor says that consumptive children have lashes twice as long as those of healthy little ones. While a normal baby's eyelashes grow about an eighth of an inch during its first year, tiny sufferers from infantile diseases have at the end of twelve months lashes twice as long. These discoveries were made in a hospital attached to one of the Imperial Universities.

true dyes are easiest to use!

Dresses, drapes or lingerie look new when they're re-dyed with Diamond Dyes. No spotting or streaking; never a trace of that re-dyed look. Just rich, even, bright colors that hold amazingly through wear and washing.

Diamond Dyes are the highest quality dyes you can buy because they're so rich in pure aniline. That's what makes them so easy to use. That's what they've been famous for 50 years. 15 cent packages—all drug stores.
